

## **The Australian Mathematical Society (Inc)**

### **Student Support at Annual Conferences**

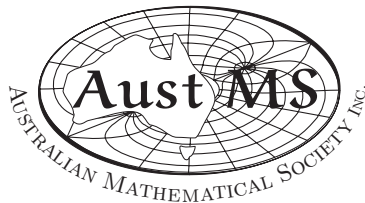

An amount, up to \$500 per student in 2012, will be available to support students of the Australian Mathematical Society who attend the annual conference and present a paper, and who reside outside the region in which the conference is being held.

This will encourage students to attend the annual Australian Mathematical Society conferences; it will emphasise the importance of students giving presentations about their work; and it will provide students with a small example of ways of obtaining funding to support their research efforts.

If students are not members of the Society, they must join at the time of this application. Details are available online at the Society's webpage—see [www.austms.org.au](http://www.austms.org.au).

The deadline of two weeks prior to the start of the annual conference is firm.

Applications should be made on the attached form; the final page includes details about where to lodge the completed form. The form should include details of the full cost of travel, including air fares, registration, transfer fares, accommodation, and conference dinner if that is not included in the conference registration fee. All support obtained, or applied for, from all other sources must be listed, or an explanation as to why there is no other support available should be given.
