Awards and other achievements

On 9 August 2005, 24 Australians were presented with Australian Museum Eureka Prizes. Three of these prizes involved mathematical work. Prof. Mark Burgman from the University of Melbourne's School of Botany has won the Botanic Gardens Trust Eureka Prize for Biodiversity Research, for his work in understanding uncertainty and improving decision-making by developing better statistical methods and tools for monitoring so that decisions based on collected data are more reliable.

Dr Antonio Reverter is the winner of the NSW Ministry for Science and Medial Research Eureka Prize for Bioinformatics Research. He has developed bioinformatics algorithms revealing key genes in cattle.

Dr James Franklin from the University of New South Wales has won the Australian Catholic University Eureka Prize for Research in Ethics. Franklin has applied his proposition, that the single core of ethics is the equality of worth of every individual person, to real-world mathematical topics.

Dr John Buckland (supervisors: Klaus Ecker and Maria Athanassas) was awarded one of ten 2004 Monash University, Mollie Holman Doctoral Medals for excellence in a PhD thesis.

Dr David Easdown has been awarded the 2005 University of Sydney College of Sciences and Technology Award for Excellence in Higher Degree Supervision.

Prof. Cheryl Praeger will be awarded Docteur Honoris Causa of the Université Libre Bruxelles on 12 November in Brussels, Belgium.

The 2005 Moyal Medallist is Bob Anderssen (CSIRO) who will deliver the Moyal Lecture entitled "Mathematics in Action" on Friday 28 October 2005. The Moyal Medal is awarded annually by Macquarie University for research contributions to mathematics, physics or statistics, the areas of research of the late Prof. Jose Enrique Moyal who was Professor of Mathematics at Macquarie University for five years from 1973 to 1977.
