

## AMSI-SSAI Lecturer 2012

### Christian P. Robert Université Paris-Dauphine

Professor Christian P. Robert's research areas cover Bayesian statistics, with a focus on decision theory and model selection, numerical probability, with works cantering on the application of Markov chain theory to simulation, and computational

statistics, developing and evaluating new methodologies for the analysis of statistical models. He has written or co-written eight books on Bayesian statistics and computational methods, as well as over 150 research papers in these areas and their applications.

Lecture tour dates to be announced:
