

Winter School 2015

on Algebra,
Geometry &
Physics

29 June – 10 July 2015
The University of Queensland

Introductory and advanced courses in:

- Geometric Representation Theory
- K-Theory and its Applications
- Moonshine Conjectures and Vertex Operator Algebras
- Moduli Spaces in Symplectic Geometry

Who should attend?

Students and researchers working on the interface of geometry and mathematical physics.

Full travel grants available!

In collaboration with the 2015 MSI Special Year in Geometry and Physics
