

## AMSI-Mahler Lecture Tour **Professor Akshay Venkatesh**

### **Professor of Mathematics, Stanford University**

Akshay Venkatesh's current research interests are in the fields of counting, equidistribution problems in automorphic forms and number theory, in particular representation theory, locally symmetric spaces and ergodic theory.

In 2008 Akshay won the SASTRA Ramanujan Prize for outstanding contributions to areas of mathematics influenced by the genius Srinivasa Ramanujan.

**See [www.amsi.org.au/Venkatesh](http://www.amsi.org.au/Venkatesh) for lecture dates**  
*Tour starts 23 September 2013*

Professor Kurt Mahler made major contributions to Australian Mathematics from his arrival in the 1960s, until his death in 1988. The Mahler Lectureship is awarded biannually to a distinguished mathematician. Find out more at **[www.austms.org.au/The+Mahler+Lectureship](http://www.austms.org.au/The+Mahler+Lectureship)**
